

STREAM Science, Technology, Religion Engineering, Art, Mathematics

September STREAM Home Project for this month was to see how creative you could be using an unsharpened pencil as the base of the project. It can be anything, animal, plant, mechanical, alien, robotic, mythical, magical and/or an invention! Use your imagination!

Students can use more than one pencil and any other materials that they want.

Projects are voluntary and may be turned in to Mrs. Ackerson for a sweet reward!

SEPTEMBER STREAM HOME challenge ends 9/30/19. There will be a new challenge each month!

Kelly Ackerson
Middle School Science and
STREAM Teacher
